

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning on line 25 of page 12 as follows:

When it is determined that the frame is from the first subsequence, the frame is encoded (step 824), packetized (step 828), and sent via a first ~~first~~ path (step 830). When it is determined that the frame is not from the first subsequence, the frame is encoded (step 844), packetized (step 848), and sent via a second path (step 850).
